

# DPF CLEANER

## off car

**Mi**DEX  
midex.uk

### Professional Formula

**Restores DPF to full-function in less than 2 hours.**

---

Heavy duty, quick-acting and safe to use DPF cleaner. Restores diesel particulate filters back to full function in less than two hours by removing soot, ash and other contamination. Particularly recommended for severely blocked DPFs.

---

#### Directions For Use:

**Use protective gloves and safety glasses.  
Only for use off-car.**

Remove DPF from vehicle and remove sensors and probes. For best results, completely submerge DPF in bath of Midex DPF Cleaner and leave to soak for one hour. Then gently agitate periodically to aid cleaning, making sure the fluid continues to cover the DPF completely. After 90 to 120 minutes, remove filter from cleaning bath and rinse with warm water until water runs clear. After cleaning, filter should be dried thoroughly before re-installing.

**Note: Severely blocked filters can be soaked for longer if required, download the technical data sheet for further details.**

In the absence of a bath, the DPF can be cleaned by temporarily blanking off the sensor holes and the engine-end aperture and filling with Midex DPF Cleaner, ensuring the filter core is covered. Leave to soak for one hour, then shake gently occasionally to aid soot removal. After two hours rinse and dry as directed above.

#### **IRRITATING TO EYES AND SKIN.**

**In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.  
KEEP OUT OF REACH OF CHILDREN.**
